

IRISH NATIONAL HYDROLOGY CONFERENCE 2009
**INNOVATIVE APPROACHES IN HYDROLOGY – PUTTING
RESEARCH INTO PRACTICE**

Tuesday, 10th November 2009

INTRODUCTION

The National Committees of the International Hydrological Programme and the International Commission on Irrigation and Drainage have the pleasure to invite you to participate in the tenth Irish National Hydrology Conference to be held on 10th November 2009 in the Tullamore Court Hotel, Tullamore. Now celebrating its tenth anniversary, this event provides a unique forum for attendees to share policy developments, research results, and practical solutions to engineering hydrology issues. This year's conference will encompass a wide range of developments in the fields of surface water and groundwater hydrology.

MAIN TOPICS

The conference will address a wide range of issues relating to hydrology and will draw on innovative approaches in all aspects of hydrology, including:

- River Basin and Flood Risk Management.
- Water Resource Management.
- Coastal Flooding
- Hydrological Extremes
- Groundwater Hydrology
- Pluvial Flooding
- Flood Estimation Techniques.
- Advances in Hydrological Measurement

The papers to be presented will demonstrate how practitioners are implementing the outcomes of recent hydrological research.

ORGANISERS

International Hydrological Programme (IHP)

The UNESCO international scientific co-operative programme in hydrology and water resources, the IHP, was established to act as a catalyst to promote co-operation and research in the management of water resources, an issue which had been identified as a significant limiting factor for harmonious development in many regions and countries of the world.

International Commission on Irrigation and Drainage (ICID)

The mission of the ICID is to stimulate and promote the development of the management of water and land resources for irrigation, drainage, flood control and river training applications, including research and development and capacity building.

ACKNOWLEDGEMENTS

The organising committee would like to thank Engineers Ireland, the International Association for Hydraulic Research, the International Association for the Hydrological Sciences, and the British Hydrological Society, for the publicity and support they have provided for this event.

CONTENTS

SESSION 1: GROUNDWATER HYDROLOGY

The Impact of Land spreading Organic Wastes on Biomass Crops: Ground and Surface Waters Paul Galbally (Teagasc), Declan Ryan (Teagasc), Kevin McDonnell (UCD), John Finnan (Teagasc).....	3
Groundwater Recharge and its Relationship to Surface Runoff in Ireland Bruce Misstear (TCD), Donal Daly (EPA), Les Brown (Eugene Daly Associates).....	13

SESSION 2: HYDROLOGICAL EXTREMES

Calculating Extreme Sea Level Probabilities Around Complex Coastlines: A Best Practice Approach Crispian Batstone (JBA), Mark Lawless (JBA), Kevin Horsburgh (Proudman Oceanographic Laboratory), David Blackman (Proudman Oceanic Laboratory), Jonathan Tawn (University of Lancaster).....	24
Low Flow Prediction for Ungauged River Catchments in Ireland Uzzal Mandal (RPS Consulting Engineers), Conleth Cunnane (NUIG).....	33

SESSION 3: RIVER BASIN AND FLOOD RISK MANAGEMENT

Empirical Investigation of the Influence of Flood-Plain Attenuation Effects on Flood Flow Ahilan Sangaralingam, John O'Sullivan, Micheal Bruen, (UCD).....	49
The Hydrological Analysis for the Fingal-East Meath Flood Risk Assessment and Management Study Keshav Bhattacharai, Scott Baigent (Halcrow Barry Ltd.).....	58

SESSION 4: PLUVIAL FLOODING AND FLOOD RESPONSE

An Innovative Approach to Pluvial Flooding Mark Morris, Ross Bryant, Simon Waller, Neil Hunter, Rob Lamb, Amanda Crossley, Vanessa Balmbra (JBA Consulting).....	68
North Dublin City Pluvial Flooding, 9th August 2008 Gerard O'Connell (Dublin City Council)	79
The Management of Flood Emergencies Jessie Walsh (DCC – Major Emergency Management Project Coordinator)	86
